

Welcome to the Lost Elm Dispersal

We are pleased with the accomplishments of Lost Elm Brown Swiss and proud to offer them for your approval. Both Pixie and Pixy represent our ideals for highly profitable production combined with Excellent confirmation and reliable cow families. We wish much success with your purchases.

The Luttrupp Family

Pixie - Total Performance Winner at Madison

Pixy after finishing her
WORLD RECORD

THE BEST IN BROWN WILL BE IN TOWN !!

We welcome you to the Lost Elm Complete Dispersal and thank the Luttropps for allowing us the opportunity to present their fine herd at auction. This complete dispersal represents one of the finest total herd sales to be conducted for several years. During the last eight years key members have been selected from the most reliable reproducing families in the Brown Swiss Breed and brought to Lost Elm. Strong emphasis has been placed on both type and production when making mating decisions and in the ET work. The results are evident thru the pages that follow and include World Record Production, competitive All American type and "Ex" cows 6, 7 & 8 generations deep. No less than 80 lots sell from "Ex" dams and 65 sell from dams over 30,000m and up to 58,830m.

The health and care of the herd is exceptional with great production and low cell counts as well as aggressive nutrition and vaccination programs. We urge you to take advantage of this RARE opportunity to add solid profit proven genetics to your program. Make a date for your future. We hope to see you in Fond du Lac March 18th and 19th when "The Best in Brown Will be in Town".

Wayne E. Sliker, Sales Manager
